EXPERIENCE

MyDB Solutions, West Valley City, Utah — Software Developer

October 2023 - PRESENT

At MyDBSolutions I was responsible for building custom full-stack software for our clients. I worked with customers to make their data work for them. I built full-stack solutions using Filemaker, MySQL, PHP, Ruby On Rails, React, Laravel, Javascript, HTML, and CSS. Along with that, I managed the AWS servers where we hosted solutions.

Swipeclock, South Jordan, Utah — Backend Developer

January 2023 - October 2023

At Swipeclock I worked on the backend scripting team. There we used C# to customize our clients and customers' solutions. I was responsible for handling 20-30 requests at a time, along with writing queries for our technical support team.

RizePoint, Cottonwood Heights, Utah — Web Developer

May 2020 - January 2023

As a Web Developer and Marketing automation specialist, I create high-quality web applications that meet client's needs and set up marketing automation campaigns to streamline lead nurturing and customer engagement processes. I work collaboratively with stakeholders to deliver solutions that are user-friendly, optimized for performance, and help businesses grow.

EDUCATION

University of Utah- devpoint labs, — Professional web developer

January 2019 - April 2020

PROJECTS

Project Name — Mountain States line Constructors

The client needed a custom full-stack application. I built a web portal for

SKILLS

PHP, Python, Ruby, React, NodeJS, Typescript, JS, HTML, CSS, SQL, git, AWS, Bootstrap, Tailwind.

their admin, applicants, apprentices, and entities. The portal was used to track hours, upload documents, sign up for training, complete training, message, fill out applications, find jobs, etc. Using filemaker, PHP, SQL, Bootstrap, HTML, CSS, and AWS I was able build this for them.
